

The following two charts depict the **amount paid** for REO homes **in percent of** list price. In other words if the **list** price was \$100,000 and the buyer paid full price the percentage would be 100%. If the buyer paid \$101,000 the percent would be 101%, if the buyer paid \$99,000 the percent would be 99% etc. The **pareto chart** shows us the category with the highest count on top in descending order. The **histogram** shows us the distribution of the sales price percentage. In other words, it tells us where most sales occurred in relation to **list** price as well as if they are centered or skewed toward the higher or lower side of **list** price.
